

<b>Safety Culture Ladder NEN</b>			
Decision number:	2022-003		
About:	Decision related to use SAQ Compact with SCL Light		
Date:	2022-10-06		
Implementation:	Publication on website and in handbook	Valid starting:	Directly

**Background:**

Organizations that want to work with the SCL must choose one of several SCL products. This choice then determines which questionnaire can or should be used; the abbreviated questionnaire SAQ Compact or the detailed SAQ Extended.

Until now, it was not possible to apply the compact questionnaire to SCL Light. In practice, this has repeatedly led to companies and organizations that want to join the SCL and opt for SCL Light being deterred by the large questionnaire of the SAQ Extended.

The number of questions to be answered and the difficulty of the questions, which can be too high for many employees, scares off many organizations, causing them to choose the product SCL ASA.

The SCL Committee of Experts believes that that is not a good development.

**Decision:**

The SCL Committee of Experts therefore took the following decision at its meeting of 28 September 2022:

**From 1 October 2022, the SCL Light product requires at least the use of the "SAQ Compact" questionnaire.**
